Survey for K-31 bridge replacement to start soon

The Kansas Department of Transportation (KDOT) plans to start a field survey at a bridge on K-31 in Anderson County the week of Sept. 5. The bridge spans the North Fork of the Little Osage River and is ½ mile east of the east U.S. 59/K-31 junction.

The survey area of 2,640 feet is based on the existing highway alignment. Survey crew members will gather information for the detailed design of a future bridge replacement project. KDOT expects the survey to be complete by Oct. 21.

Activities include the use of survey instruments on the ground to determine locations of existing features within the corridor. A member of the survey crew will contact property owners or tenants for permission to enter private property. Brian Westberg with BG Construction will manage the survey for KDOT. Persons with questions may contact KDOT Public Affairs Manager Priscilla Petersen, (620) 902-6433.
